Elaboration

The evidence indicates that Israeli military forces were active in the Tasil area of Daraa, Syria, and the West Bank in February 2025. Specifically, there were reports of clashes and operations in Tasil in April 2025, and the IDF conducted operations in the West Bank, including Jenin and Tulkarm, during the same period. The claim is partially supported by the evidence, as it mentions the presence of Israeli military forces in Tasil. However, the evidence does not confirm that the image depicts the Israeli military entering Tasil in February 2025. Therefore, the claim is unverified.
