Evidence

Evidence from web_search

The provided web sources discuss the September 2024 Israeli attacks against Lebanon, part of the ongoing Israel–Hezbollah conflict. The attacks included airstrikes and a pager attack on September 17 and 18, 2024, which resulted in casualties and civilian displacement. The Guardian article mentions Israeli strikes on southern Lebanon and Beirut, and CNN reports on intense Israeli airstrikes targeting Hezbollah, with images of the aftermath of attacks. The Wikipedia article mentions the pager attack on September 17 and 18, 2024, which killed 42 people and injured at least 3,500.
