Evidence

Evidence from web_search

PBS News Hour reported on October 2, 2024, that Israel's air-defense system intercepted projectiles fired from Iran, with the Iron Dome having a success rate of over 90% during the attack. The article mentions that Iran fired over 180 missiles. (<https://www.pbs.org/newshour/world/israels-air-defense-system-passes-test-in-fending-off-iranian-missile-strike>)

The Associated Press published an article discussing the Iranian missile strikes on Israel, mentioning that the Iron Dome is not foolproof, and interception rates are generally high. (<https://apnews.com/article/israel-air-defense-f0e72fa1c1dba6bc08fcc0bfb0c5a9f0>) [image:k](#), [image:l](#), [image:m](#)

Elaboration

The PBS News Hour article states that the Iron Dome had a success rate of over 90% during the attack. The article also mentions that Iran fired over 180 missiles. The Associated Press

article also mentions that the Iron Dome's interception rates are generally high.

Based on the evidence, the claim is likely true.

Final Judgement

The evidence from PBS News Hour indicates that the Iron Dome had a success rate of over 90% in intercepting projectiles during the Iranian attack on October 1, 2024. The Associated Press also supports the claim by stating that the Iron Dome's interception rates are generally high.

The claim is supported by evidence from multiple reliable sources. `true`

Verdict: TRUE

Justification

The Iron Dome intercepted projectiles fired from Iran with a success rate of over 90% during the attack on October 1, 2024, according to a report by [PBS News Hour](#). The Associated Press also supports the claim by stating that the Iron Dome's interception rates are generally high.
