Evidence from `image_search`

Al Jazeera published an article on November 12, 2023, about Israeli jets striking South Lebanon after a Hezbollah attack, including an image

Elaboration

The evidence indicates that there have been clashes between Hezbollah and Israel, including incidents involving helicopters and drones. However, the provided evidence does not confirm the specific claim that the image depicts an Israeli helicopter shot down by Hezbollah on November 23, 2024. The image search did not return any results for the original image. Therefore, the claim cannot be verified.

Evidence

Evidence from `image_search`

ABC News published an image of an Israeli helicopter (<https://abcnews.go.com/International/live-updates/israel-hamas-hezbollah?id=114770972&entryId=114771648>)

. Business Insider published an article in November 2024 about counter-drone helicopters, including an image of an Israeli helicopter (<https://www.businessinsider.com/counter-drone-helicopters-israel-ukraine-air-defenses-2024-11>)

Elaboration

The image search results show images of Israeli helicopters, but none of them match the image in the claim. The search also did not return any results about an Israeli helicopter being shot down by Hezbollah in November 2024. Therefore, I cannot verify the claim.

Final Judgement

The image search did not yield any results that confirm the claim. While there have been clashes between Hezbollah and Israel, and incidents involving helicopters, there is no evidence to support the specific claim that the image depicts an Israeli helicopter shot down by Hezbollah on November 23, 2024.

false

Verdict: FALSE

Justification

The claim is unverified. Reverse image search did not yield any results for the image. While there have been clashes between Hezbollah and Israel, and incidents involving helicopters, there is no evidence to support the specific claim that the image depicts an Israeli helicopter shot down by Hezbollah on November 23, 2024.
