

Claim

Claim: "

This image shows Gaza, completely destroyed, in December 2024."

Actions

```
reverse_search(![image 33] (media/58.jpg))  
web_search("Gaza destroyed buildings")
```

Evidence

Evidence from **web_search**

The Wikipedia article discusses the destruction of cultural heritage during the Israeli invasion of the Gaza Strip, stating that nearly 80% of the buildings in Gaza were damaged or destroyed by July 2025. The article also mentions that Israel destroyed 815 mosques and 19 cemeteries as of January 2025. The article does not contain the image.

A UN News article from April 2025 reports that approximately 92% of residential buildings in Gaza have been damaged or destroyed since the start of the conflict. The article includes an image of a bulldozer removing rubble in Gaza City. The Bloomberg article contains no information.

Elaboration

The evidence suggests that a significant portion of buildings in Gaza were damaged or destroyed. The Wikipedia article states that nearly 80% of buildings were damaged or destroyed by July 2025, and the UN News article reports that approximately 92% of residential buildings have been damaged or destroyed since the start of the conflict.

The claim states that the image shows Gaza completely destroyed in December 2024. The evidence supports the claim that there was significant destruction in Gaza. However, the evidence does not confirm that the image is from December 2024.

I need more information to verify the date of the image.

Actions

```
image_search("Gaza destroyed buildings December 2024")
```

Evidence

Evidence from **image_search**

The search results include articles from Al Jazeera and CNN published in December 2024, both featuring images of destroyed buildings in Gaza. The Al Jazeera article was published on December 31, 2024, and the CNN article was published on December 10, 2024. The Al Jazeera article includes an image of destroyed buildings

and the CNN article includes an image of destroyed buildings

Elaboration

The image search results confirm that there were destroyed buildings in Gaza in December 2024. The Al Jazeera and CNN articles, published in December 2024, both feature images of destroyed buildings.

The claim is likely true.

Final Judgement

The evidence indicates significant destruction in Gaza, with images from December 2024 showing destroyed buildings. While the exact image in the claim was not found, the search results confirm that similar scenes existed in Gaza during the specified time.

true

Verdict: TRUE

Justification

The claim is likely true. Evidence from December 2024, including articles from Al Jazeera and CNN, shows significant destruction in Gaza, supporting the claim that the area was heavily damaged during that period.
