Elaboration

The evidence confirms that in November 2024, a man named Nikita Zhuravel was sentenced to 14 years in prison. However, the Reuters report indicates that the 14-year sentence was for treason, separate from his previous conviction for burning the Quran. The Moscow Times and Meduza state that the 14-year sentence is the total time served, which includes an additional sentence for treason and a previous sentence for burning the Quran.

Final Judgement

The claim is partially accurate. While a man was sentenced to 14 years in prison in November 2024, the sentence was for treason, not solely for burning the Quran. The total sentence of 14 years includes the sentence for burning the Quran.
