

# Claim

Claim: "

This image shows a US drone which was shot down in March 2025 by the Houthis using Russian missiles."

## Actions

```
reverse_search(![image 20](media/62.jpg))  
web_search("US drone shot down Houthis Russian missiles")
```

## Evidence

### Evidence from **reverse\_search**

The image

## Evidence from web\_search

The Atlantic Council reports that the Houthis shot down a US MQ-9 Reaper over Yemen on December 28, 2024, and another in the Marib governorate in 2025. The Houthis have claimed responsibility for downing fourteen MQ-9 Reaper drones since November 2023. Iran mediated talks between Russia and the Houthis that led to Moscow supplying Russian-made advanced anti-ship cruise missiles to the group. [Source](#)

NPR and CNN report that the Houthis shot down seven U.S. Reaper drones in recent weeks. The U.S. launched a major military campaign targeting the Houthi rebel group in Yemen in March 2025. The U.S. has hit over 700 targets and launched more than 300 airstrikes since the campaign began on March 15. [Source](#), [Source](#) [image:i](#)

## Elaboration

The evidence suggests that the Houthis have shot down US MQ-9 Reaper drones. The Atlantic Council reports that the Houthis shot down a US MQ-9 Reaper over Yemen on December 28, 2024, and another in the Marib governorate in 2025. NPR and CNN report that the U.S. launched a major military campaign targeting the Houthi rebel group in Yemen in March 2025.

The claim states that the image shows a US drone shot down in March 2025 by the Houthis using Russian missiles. The evidence does not confirm the image's origin or the specific circumstances of the drone's downing. However, the evidence does support the claim that the Houthis shot down US drones in March 2025.

The evidence does not confirm the image's origin or the specific circumstances of the drone's downing. The claim that the Houthis used Russian missiles is supported by the Atlantic Council, which reports that Iran mediated talks between Russia and the Houthis that led to Moscow supplying Russian-made advanced anti-ship cruise missiles to the group.

image_search("drone crash site")
```

# Evidence

## Evidence from web\_search

The Escape from Tarkov Wiki discusses a quest involving crashed UAV drones on Shoreline,

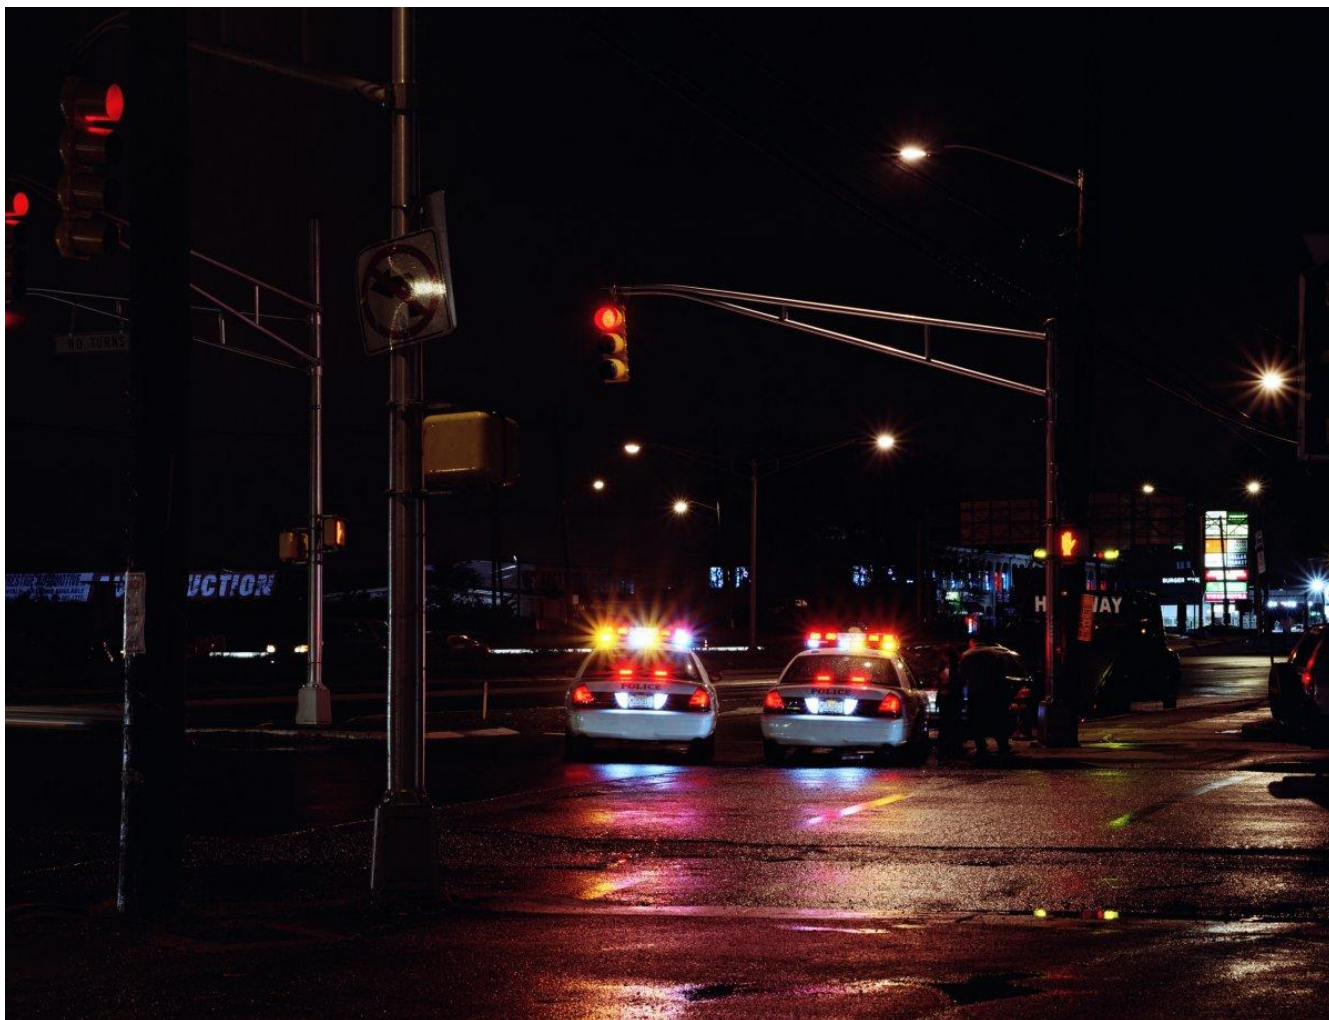

with images of the crash sites (

). The Hindustan Times reported on a drone crashing into a New Jersey backyard in December 2024. Newsweek reported on mysterious drone sightings and an alleged crash in New Jersey, with the FBI and local police investigating (

).

### Evidence from `image_search`

The search results provide images of drone crash sites. Dronewars.net shows a crashed drone

assessing the Metrojet crash site in Egypt . NBC News shows a drone

. The Mayor shows a drone crash site in Zagreb, Croatia

## Elaboration

The evidence provides images of drone crash sites, but none of them match the image in the claim. The evidence does not provide any information about the location of the crash site in the image. Therefore, I cannot verify the claim.

## Actions

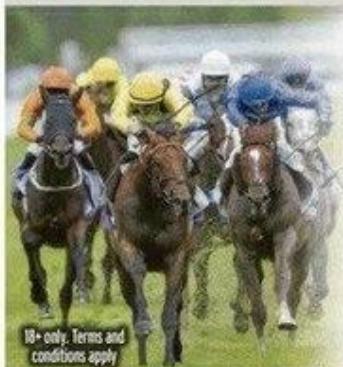

```
web_search("drone crash site Israel")  
image_search("drone crash site Israel")
```

## Evidence

### Evidence from **web\_search**

Al Jazeera reports that two Lebanese soldiers were killed while investigating an Israeli drone crash in southern Lebanon on August 28, 2025. The Times of Israel reports that an Israeli Air Force Hermes 900 drone was shot down over the Isfahan area in central Iran on June 18, 2025, and includes an image of the crashed drone. The Jerusalem Post reports that an Iranian Shahed 136 drone crashed into a building in Beit She'an, Israel, on June 21, 2025, and includes an image of the crash site.

Evidence from image\_search

Al Jazeera's search result includes an image of a crashed drone

. Defense News shows an image of an Israeli F-16I destroyed in an attack

## Elaboration

The evidence provides images of drone crash sites, including one from the Times of Israel of an Israeli Air Force Hermes 900 drone shot down over Iran on June 18, 2025, and another of an Iranian Shahed 136 drone that crashed in Beit She'an, Israel, on June 21, 2025. However, none of the images match the image in the claim. Therefore, I cannot verify the claim.

## Final Judgement

The image in the claim does not match any of the drone crash sites found in the search results. The claim also states that the drone was shot down by the Houthis, but the evidence does not confirm this. Therefore, the claim is not factually accurate. `false`

**Verdict: FALSE**

### **Justification**

The image in the claim does not match any of the drone crash sites found in the search results. While there is evidence of US drones being shot down by the Houthis, the specific image and its context cannot be verified. Therefore, the claim is false.
