

Claim

Claim: "This image shows the ruins after a 7.9-magnitude earthquake in Myanmar on March 28, 2025."

Actions

```
image_search("Myanmar earthquake ruins")
```

Evidence

Evidence from `image_search`

The search results discuss an earthquake in Myanmar. One source from artnews.com contains an image of ruins

. Another source from [Archaeology.org](https://www.archaeology.org) discusses an earthquake in Myanmar that exposed an ancient royal structure

. National Geographic also shows an image of ruins in Myanmar

Elaboration

The evidence confirms that an earthquake occurred in Myanmar. However, the provided images from the search results do not match the image in the claim. The search results show images of different ruins, including an ancient royal structure and other damaged buildings.

The claim states the image shows the ruins after a 7.9-magnitude earthquake. The evidence does not provide information about the magnitude of the earthquake or the date.

Therefore, I cannot verify the claim based on the provided evidence. I need more information to confirm the image's origin and the earthquake's details.

web_search("Myanmar earthquake March 28 2025")
```

Evidence

Evidence from `image_search`

From [Source](#): Content: Britannica.com discusses the Myanmar earthquake of 2025 and provides an image of the ruins

Evidence from web_search

The web sources discuss the 2025 Myanmar earthquake, which occurred on March 28, 2025. The earthquake had a magnitude of 7.7-7.9 and struck near Mandalay, causing significant casualties and damage. The earthquake's impact is detailed in articles from Wikipedia, ScienceDirect, and phys.org, with the latter mentioning the rupture along the Sagaing Fault. The Wikipedia article mentions the earthquake caused 5,456 fatalities, 11,404 injuries, and 538 missing. The ScienceDirect article is titled "In the wake of the March 28, 2025 Myanmar earthquake: A detailed examination" and the phys.org article mentions the earthquake caused widespread damage and over 5,000 casualties.

The sources include images of ruins

, [image:0](#).

Elaboration

The evidence confirms that a 7.7-7.9 magnitude earthquake occurred in Myanmar on March 28, 2025, causing significant damage. The search results provide images of the ruins.

The image from Britannica.com (<https://www.britannica.com/event/Myanmar-earthquake-of-2025>) shows ruins, but it does not match the image in the claim.

Therefore, the claim is not verifiable based on the provided evidence.

Final Judgement

The search results confirm the existence of a 7.7-7.9 magnitude earthquake in Myanmar on March 28, 2025, which caused significant damage. However, the images of the ruins provided in the search results do not match the image in the claim.

The claim is not supported by the evidence, as the image in the claim is not found in the search results. `false`

Verdict: FALSE

Justification

The claim is **false**. While a 7.7-7.9 magnitude earthquake did occur in Myanmar on March 28, 2025, as confirmed by sources like [Britannica.com](https://www.britannica.com), the image provided in the claim does not match the images of the ruins found in the search results.
