Elaboration

The claim is demonstrably false. Multiple sources, including Snopes (<https://www.yahoo.com/news/fact-check-facts-behind-resurfaced-231800640.html>), debunk the assertion that Zelenskyy owns 15 homes, a home in Florida, private planes, and has a monthly income of \$11 million.

Evidence indicates Zelenskyy declared fewer than 15 properties, none in the U.S., and no planes. His overseas bank account holds approximately \$377,000, and his annual income is around \$300,000, which is about \$25,000 per month. Other sources state his real estate portfolio is worth \$4 million and that his net worth is roughly \$1.5 million, with a monthly income of \$930.

Furthermore, the evidence suggests that Zelenskyy's financial situation has been affected by the war, with a decrease in income and the temporary suspension of rental income from real estate.

Final Judgement

The claim is false. The evidence from multiple sources, including fact-checks, contradicts the details of the claim. Zelenskyy's actual assets and income are significantly less than what is stated in the claim. *false*

Verdict: FALSE
