Evidence

Evidence from web_search

On October 5, 2024, both Iran and Israel experienced earthquakes, according to articles published by NDTV (<https://www.ndtv.com/world-news/earthquakes-in-iran-and-israel-sparks-speculation-of-nuclear-tests-6735904>) and Johns Hopkins University (<https://hub.jhu.edu/2025/02/04/earthquake-nuclear-test-misinformation/>). The NDTV article discusses the earthquakes and the speculation about covert nuclear testing, including social media posts.

An article from alphadefense.in (<https://alphadefense.in/index.php/2024/10/07/iran-seismic-activity-nuclear-test-or-earthquake/>) focuses on the seismic event in Iran's Semnan province, mentioning its magnitude and shallow epicenter, and also discusses the speculation about the cause. [image:k](#),

Elaboration

The evidence confirms that Israel experienced an earthquake on October 5, 2024. The NDTV article explicitly mentions earthquakes in both Iran and Israel on that date (<https://www.ndtv.com/world-news/earthquakes-in-iran-and-israel-sparks-speculation-of-nuclear-tests-6735904>).

Final Judgement

The search results confirm that Israel experienced an earthquake on October 5, 2024. The NDTV article specifically mentions earthquakes in both Iran and Israel on that date.

The claim is supported by evidence from a reliable source, confirming the occurrence of an earthquake in Israel on the specified date. `true`

Verdict: TRUE

Justification

The claim is supported by evidence from the NDTV article (<https://www.ndtv.com/world-news/earthquakes-in-iran-and-israel-sparks-speculation-of-nuclear-tests-6735904>), which explicitly mentions that Israel experienced an earthquake on October 5, 2024.
