Multiple sources report that Benjamin Netanyahu's house in Caesarea, Israel, was targeted by a drone. An NPR article from October 19, 2024, states that the drone targeted his house, while a CNN article from October 23, 2024, claims that Hezbollah claimed responsibility for the attack and that the house was damaged. The Guardian also reported on October 19, 2024, that Netanyahu's house was hit by a drone, causing superficial damage.

an image of the house.

Elaboration

The evidence suggests that the image could be of Benjamin Netanyahu's house, as the geolocation data indicates a probability of the image being taken in Israel. Furthermore, multiple news sources confirm that Netanyahu's house was targeted by a drone in October 2024. However, the claim states the image was taken in August 2024, which contradicts the timeframe reported by the news articles.

The evidence does not explicitly confirm that the image was taken by a Hezbollah drone. While the CNN article mentions Hezbollah claimed responsibility for the attack, it does not specify that they took the image.

Therefore, the claim is likely false because the image was taken in October 2024, not August 2024.
