Evidence

Evidence from **reverse_search**

The image

of an explosion over a city at night is found on multiple websites. One source, "[Islamic State \(ISIS\) cell reportedly attacked ... - Syria Live Map](#)", labels the image as "A picture of the raid that targeted the Al-Laylaki area a short while ago" and dates it October 22, 2024

Another source, "[News Live - Oregon](#)", also contains the image with the same label and date

. The image is also found on "[Middle East on the brink: Gaza, Israel, Iran - Harapan Daily](#)"

Elaboration

The claim that the image shows Israel attacking Iranian military targets on October 26, 2024, is not supported by the evidence. The image is associated with an event on October 22, 2024, and is labeled as a raid targeting the Al-Laylaki area.

The evidence suggests the image depicts an event that occurred on October 22, 2024, not October 26, 2024, as the claim states. The evidence also does not mention Israel or Iranian military targets.

Therefore, the claim is inaccurate.

Final Judgement

The image is associated with an event on October 22, 2024, and is labeled as a raid targeting the Al-Laylaki area. The claim states the image shows an event on October 26, 2024, and mentions Israel attacking Iranian military targets, which is not supported by the evidence.

false

Verdict: FALSE

Justification

The image in the claim is associated with an event on October 22, 2024, as evidenced by sources like "[Islamic State \(ISIS\) cell reportedly attacked ... - Syria Live Map](#)" and "[News Live - Oregon](#)", which label it as a raid targeting the Al-Laylaki area. The claim's assertion of an October 26, 2024, event involving Israel and Iranian military targets is not supported by the available evidence.
