## Elaboration

The evidence confirms that the U.S. conducted airstrikes in Yemen on December 22, 2024. However, the provided image is not mentioned in the search results. Therefore, the claim that the image shows the U.S. bombarding Yemen on December 22, 2024, cannot be verified.

The claim also states that the airstrikes were in reprisal after Yemen launched an attack on Israel's capital. The evidence does not mention the reason for the airstrikes.

Insufficient information is available to verify the claim.

## Evidence

### Evidence from `geolocate`

The most likely countries where the image was taken are: {'Palestine': 0.55, 'Israel': 0.3, 'United Arab Emirates': 0.1, 'Jordan': 0.02, 'Albania': 0.0, 'Andorra': 0.0, 'Argentina': 0.0, 'Australia': 0.0, 'Austria': 0.0, 'Bangladesh': 0.0}

## Elaboration

The geolocation of the image suggests it was most likely taken in Palestine or Israel. This contradicts the claim that the image shows a bombing in Yemen. The evidence also does not provide any information about the reason for the airstrikes.

## Final Judgement

The image is likely from Palestine or Israel, not Yemen, as the claim suggests. The evidence confirms that the U.S. conducted airstrikes in Yemen on December 22, 2024, but the provided image is not mentioned in the search results. The claim also states that the airstrikes were in reprisal after Yemen launched an attack on Israel's capital, but the evidence does not mention the reason for the airstrikes.

false

### Verdict: FALSE

### Justification

The image in the claim is likely from Palestine or Israel, not Yemen, as indicated by the geolocation results. While the U.S. did conduct airstrikes in Yemen on December 22, 2024, the provided image is not associated with those strikes, and the claim's assertion about the cause of the airstrikes is not supported by the evidence. Therefore, the claim is false.
